

Research opportunities in Italy - Ca' Foscari University

Marie Skłodowska-Curie Individual Fellowships (IF) provide **researchers from all over the world** with the opportunity to **acquire and transfer new knowledge** and to **work on research** in a European context or outside Europe.

With the aim of promoting excellence in research and fostering the exchange of knowledge, we encourage all researchers from abroad to apply for a grant and to **choose Ca' Foscari University as Host Institution**: our [research themes](#) match many topics and we offer an [outstanding research environment](#) to carry out their project.

Call opening: March 12, 2015

Deadline: September 10, 2015

Our **International Research Office** will support international researchers in drafting the project proposal.

Research topics promoted by potential Supervisors at Ca' Foscari

Department of Humanities	Maritime Archaeology and History
Department of Economics	Systemic risk in financial markets / Network modelling and application
Department of Linguistics and Comparative Cultural Studies	Spanish Language and Linguistics Children's Literature
Department of Molecular Sciences and Nanosystems	Synthesis of API intermediates starting from natural aminoacids Systemic approaches / Energy systems / Energy (embodied energy) analysis Bipolar electrochemistry for the remote driving of (photo)electrochemical reactions / Electrochemical nanobiosensors for molecular diagnostics of the celiac disease Nanostructured electrodes for the electrochemical determination and speciation of inorganic arsenic in food and environmental matrices / New carbon electrodes based on pyrolysed photoresist
Department of Philosophy and Cultural Heritage	Bioethics / Research Ethics / Clinical Ethics
Department of Environmental Sciences, Informatics and Statistics	Cultural Heritage and Climate Change
Venice Centre for Climate Studies	Biomass burning reconstruction and land use change in South America / Early anthropogenic activities in Europe / Use of new environmental and climatic proxies for paleoclimatic reconstructions
